

Please do not weaken the Wisconsin No Call List law. I signed my 83 year old widowed mother who lives in her own home up for the WI no call list 2 years ago. It has helped her to live quietly and undisturbed in her own home without being constantly harrassed by unsolicited phone calls that she doesn't understand. These calls were making her so nervous. I, too, have signed up for WI's no call list. When I come home from a long day at work I can now eat my dinner undisturbed by unwanted phone calls. I consider it an invasion of my privacy to get these unsolicited calls. My phone is not a public advertizing device. I should not have to screen the calls to know if it is a telemarketer or one of my children calling me. Thank you for considering my concerns.
